Wisconsin Processing Vegetables

2011 production of sweet corn and snap beans for processing are both expected to decrease in Wisconsin. Sweet corn for processing production is anticipated to total 522,570 tons, down 12 percent from last year. This decrease is due to a drop in acres harvested, from 78,700 in 2010 to 66,400 in 2011. Contracted snap bean production is forecast at 258,320 tons, down from 308,750 tons last year.

Nationally, the 2011 contracted processing production for sweet corn and snap beans is forecast at 3.29 million tons, down 4 percent from a year ago. Contracted snap bean production, at 656,340 tons, dropped 12 percent. Contracted sweet corn production fell 2 percent to 2.64 million tons.
